Predicted Forest Above-ground Carbon

biomass estimates based on
Ter-Mikaelian &
Korzukhin, 1997
Allometric Formulas
1:200,000

Above-ground organic carbon estimates for the Bruce Peninsula area created using the Ter-Mikaelian & Korzukhin, 1997 allometric formulas. Estimates of organic carbon for this grid are presented in tonnes/hectare. Carbon was estimated by multiplying predicted above-ground biomass by 0.475. This relationship was derived from the relevant literature.
